

PackageJS.AI

Overview for Investors and Partners

Proposals
Funding Request

What is PackageJS.AI?

An **AI application builder** for rapidly developing **production-ready** and **scalable** full-stack apps.

Case Study: Turn a mockup into a real working app for local startup

- ❌ AI-assisted coding was **bloated** with **other app builders**,
- ❌ Startup founder **ran into walls** with **vibe-coding** platforms,
- ✅ **PackageJS.AI** produced an app that is **easily reviewable** and **fully customizable**.

Vibe-coding platforms

Infrastructure lock-in and **rising costs**

Not secure: Does not work on-prem or offline

Expert developers hit **customization ceilings**

vs. **PackageJS.AI**

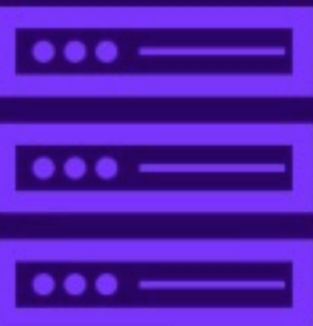

Predictable costs: Buy once, use forever

Secure: Self-host, build and deploy offline

Fully-customizable

AI-assisted coding

	Next.js	PackageJS.AI	
Lines 	137,000	300	99.8% improvement
Storage 	44 MB	0.3 MB	99.4% savings
Tokens 	200k	40k	80% fewer

Bloated context

Wastes time onboarding and reviewing
Continuous errors and **hard to find** vulnerabilities
Unstructured and **unpredictable** results

	Next.js	PackageJS.AI	
Lines 	137,000	300	99.8% improvement

Professional AI Coding

- 1.) **Architected** to scale and **reviewable** in human hours.
- 2.) **Focused**, narrow scope and **predictable** modifications.
- 3.) Collaboration and **version control**.
- 4.) **Secure** build and deployment.
- 5.) Responsible practices and environmental **sustainability**.
- 6.) **Cost certainty** and token-usage **savings**.

More deal flow **for Partners**

PackageJS.AI helps founders build startups more efficiently.

Faster development = **quicker validation** and less waste.

Successful startups -> attract talent -> **more startups.**

Addressable Market

\$30.8B (2024) low-code development market,
\$38.84B (2025), projected **\$248.31B (2033)**.

Replit \$16M ARR (2024) to \$102M ARR (2025),
22.5M devs (2023) to **40M** devs (2025),
500K business users (2025).

Funding request

Go-to-market

Target these non-tech vibe coders who have hit the wall and are looking for a professional to continue development.

Business model

Software license (buy once, use forever),
priority customer support (recurring),
expert contractors / agent of record (cost + %).

Ask, goal, and use of funds

\$3M for team, DevRel (developer relations)
to onboard 30k vibe coders working with developers
at a \$500 minimum first-year spend on software licenses.

About PackageJS.AI

PackageJS.AI was developed over 5 years by an expert software architect and global Node.js community leader, with over 15 years of experience building full-stack apps for startups, luxury brands, and Fortune 500 companies.
